ACCOMMODATING AAC IN HIGHER EDUCATION

RESEARCH OPPORTUNITY

This study will explore the system of accommodations and accessibility for AAC users in post-secondary studies

Who?

- AAC users (*including people who use more than one means of communication*)
- Who have engaged in post-secondary studies between 2020 - 2024
- Who have sought accommodations from their school's Disability Resources Office (whether or not accommodations were provided or were found useful)

Objectives

We will be conducting interviews and a four-week threaded discussion board as part of a research study to increase our understanding of how AAC users access accommodations in college and other higher education contexts. We would also like to know how the Covid-19 pandemic impacted the experience of accessing higher education.

You may be someone who uses AAC for all or some of your communication needs. The initial demographic survey will take 15 minutes. The interview will take 70 - 90 minutes. You will be provided with the questions in advance so that you can draft your responses. You will then be invited to join a threaded discussion board on Canvas.
